Comments: On-site recycling and reclamation of hydrocarbon solvents save you up to 50% of the cost of disposing, transporting, and replacing spent solvents; it also produces a high quality solvent equivalent to newly purchased solvent in appearance and performance. On-site compaction and consolidation of solid waste reduce the volume of compactable solids with minimal free liquids. Sells a patented, deep loading, polymetric, reusable spray booth filter lasting up to 5-15 years and is up to 94% efficient. Dry particulate can be swept off with a broom.

Comments: The Sponge-Jet technology minimizes waste from abrasive blasting, de-leading and other paint and construction activities. We manufacture composite abrasives by bonding conventional abrasive with polyurethane sponge. This allows for clean, dry, low dust, reusable abrasive blasting and promotes waste minimization by recycling abrasive media, lowering air-borne releases, benefiting worker safety and air pollution. Sponge-Jet also manufactures high production, abrasive blasting and recovery systems for use with this composite abrasive.
